

Save the Earth! Go Wired!

Wireless consumes 10x more energy than wired

Wireless Technology Radiation Harms:

- Trees and plant life
- Wildlife especially pollinators—bees, butterflies and birds
- Human health (children particularly vulnerable) — cancer, DNA damage, endocrine disruption, sleep problems, anxiety/depression, Alzheimer's, neurological and cardiac effects, infertility, developmental abnormalities, microwave sickness and more

SAVE ENERGY!

**USE faster, safer, and more secure
WIRED internet connections only!**

Protect the Planet by:

Supporting affordable broadband internet access with safe, reliable, secure WIRED infrastructure all the way to the home/premises instead of powerful wireless “small” cell antennas (5G/IoT).
Excellent resource: “[Reinventing Wires: The Future of Landlines and Networks.](#)”

- Ask Sen. Baldwin and Sen. Johnson to support H.R. 530. This Bill would help restore local control to local municipalities by overturning the overreaching Sept. 2018 FCC Order.
- Ask Governor Evers and the legislature to prohibit use of public broadband funds to install wireless technology, which endangers public health and the environment.
- Ask Governor Evers and the legislature to repeal parts of 2011 Act 22 so telecoms are again responsible for repairing copper lines, insuring capacity for landlines which are proven the most reliable emergency communication.
- Ask Governor Evers and the legislature to repeal 2013 Act 20 and return power to local governments to regulate the siting of cell phone, WiFi, and broadcast towers.
- Ask Governor Evers and the legislature to repeal Wisconsin Statute Annotated § 66.0422 and revise current statutes so communities can readily install WIRED broadband networks.
- Ask Governor Evers and the legislature to introduce legislation which will encourage affordable broadband internet access with safe, reliable, secure WIRED infrastructure all the way to the home/school/business instead of radiation emitting wireless “small” cell antennas.

Protect Your Family By:

- Turn OFF cell phones, tablets and WiFi when not in use or switch to AIRPLANE MODE.
- Avoid holding cell phone near head or body during calls.
- Avoid carrying cell phone in a pocket, bra, or sock when powered on.
- Pregnant women should keep wireless devices away from abdomen.
- Cell phones are not teething objects or toys. Keep away from children.
- Because of their thinner skulls and developing brains, the radiation penetrates more deeply into a child’s brain. Children should only use cell phones for emergencies.
- Avoid making calls in cars, elevators, trains, or buses which block the signal forcing the phone to emit more radiation to connect the call.
- Keep devices out of the bedroom. Wireless radiation interferes with sleep.
